

KX-T7630AL Display Handset

Only for Hybrid IP-PBX

3 line display

24 CO keys

Speakerphone

Designed specifically for the **Hybrid IP-PBX Panasonic phone systems**, the stylish **T76 series** handsets are user-friendly and highly functional.

Some of the great features supported by these handsets include:

- Ergonomic design **four step tilt angle** adjustment.
- **Navi key** for increase handset usability, for example, for easily changing volume or accessing system speed dial lists.
- **Whisper Off-Hook Call Announce** which makes it possible for you to whisper a message to a colleague while he or she is speaking on the telephone to another person. Only the one person hears the whispered message.
- Each handset includes a built-in **Extra Device Port** that can be used to connect a single line device such as a fax, cordless telephone, or answering machine. The 2nd port can be assigned the same extension number so that you can have a personal answering machine, or a different extension number for receiving a fax whilst talking to the sender on the telephone.
